STADIUM 2.5. Paving.

For the purpose of this study, the following definitions were adopted: *anxiety* is a state of mind characterized by a sense of apprehension, uneasiness, or worry, which does not imply any physical state of arousal; *depression* is a state of mind characterized by a sense of hopelessness, helplessness, and loss of interest in life; *burnout* is a state of mind characterized by a sense of exhaustion, cynicism, and detachment from work.

Figure 1 shows that the  $\text{R}^2$  of the regression model is 0.92, the regression coefficients are all significant at the 0.05 level, and the intercept is not significant. The adjusted  $\text{R}^2$  is 0.89, and the F-statistic is 10.74, which is significant at the 0.05 level. The regression equation is:

#### 4. TIME-TO-RE-ENTER: A critical national phase

For the first time, limits other than the 30-month time limit will be used to determine whether a person has been engaged in a continuing course of conduct. The new information on regular updates on the applicable time limits (800.533.6666) and the time limit for filing a Petition for Review will be included in the new version of the Handbook for the public and will be included in the next version of the Handbook.
